Tachonova® EVA Software

Infringements selected by type and total offences.

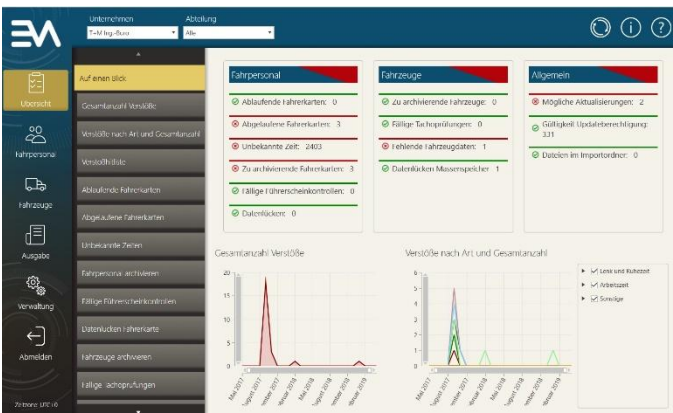

Detailed survey on activity.

Detailed survey on activity extended view.

These screenshots can be continued yet these images given already, is a well survey to demonstrate what the new EVA software can cope with.

Available too is a training version, as a teaching tool used in driving schools. This training version comes under the name EVA1SCH. Upload the data coming from the tachograph and driver card. The software can then demonstrate what the recorded data will tell. All data stored data can later be erased. It is a great tool to train drivers successfully.
